- + Smart three-camera array for life-like video
- + Proprietary DSP processing for crystal clear audio

### Zoom for Home - DTEN ME is Designed for your Home Office

The DTEN ME, the first ever Zoom for Home device, is a turnkey video communications solution that mirrors in-office collaboration technology and brings enhanced productivity to the home office. It lets you connect remotely with colleagues and clients and get work done faster. It brings instant productivity and immersive in-office collaboration to remote working using your personal Zoom account.

### The Video Meeting Solution that Changes the Game

Combining the advanced technology in the DTEN ME with Zoom's enterprise-quality software delivers the ideal solution for the home office. This solution integrates Zoom Meetings, phone calling, whiteboarding and annotation in a 27" multi-touch display built for the desktop.

As an all-in-one device, DTEN ME replaces the need for items like webcams, extra monitors, speakers or desk phones that clutter your workspace. It clears your desk so you can stay organized and get to work.

Your DTEN ME is personalized for you. You can sync your calendar, status, meeting settings, and Zoom phone for immediate access to all the tools you need for success.

### The Power of Design

The DTEN ME was built for the desktop. At 27", it is ideally sized to fit neatly on your desk and provides a display size made to see meeting participants and content clearly. It is sleek, streamlined, ultra thin and lightweight making it easily portable. Work in your home office, at your dining room table or writing desk in your living room. The DTEN ME can be placed wherever you work and then simply put away if needed.

The multi-touch hyper responsive display keeps up with the speed of your ideas as multiple participants can write and annotate at the same time. Built-in drawing tools make it effortless to illustrate your ideas as inspiration strikes. The DTEN ME will auto-correct hand drawn shapes and lines for clarity as you draw on the whiteboard. Use night mode as needed and save your whiteboard slides to send to teammates after the meeting.

## Declutters and simplifies workflow by replacing:

- + Desk Phone
- + Webcam
- + Second Monitor
- + Whiteboard
- + Speakers
- + Microphone
- + And all those messy cables

### DTEN's Smart Audio and Video Technologies Deliver an Exceptional Professional Meeting Experience

Establishing rapport, trust and genuine understanding requires attention to visual cues. The DTEN ME smart HD camera array delivers production quality video with life-like images. So go ahead and make a great first impression during every meeting. At 27", the DTEN ME HD display lets you see everyone in the meeting so you can "read the room", interpret visual cues, and feel the energy of your guests and colleagues in the meeting.

DTEN Audio AI, based on advanced machine learning, reduces background noises and distractions so you can stay focused on the conversation. Proprietary DSP audio processing delivers crystal clear audio so you won't miss a word.

### Personalized for the User

Zoom for Home -DTEN ME delivers a personalized experience. Simply login with your Zoom user account and sync your calendar, status, meeting settings, and phone for integrated HD video meetings, phone calls, content sharing, and interactive whiteboarding.

### Zoom for Home - DTEN ME is Easy to Manage and Simple to Use. No IT Required

When your DTEN ME arrives, simply open the box, take it out, plug it in, and follow the on-screen setup to get started. You can connect wirelessly or use an ethernet cable for a guaranteed connection. The HDMI-in port lets you connect your laptop or computer, making your DTEN ME your second monitor when needed. For added convenience, the DTEN ME can be managed remotely through the Zoom admin portal.
